

## **Pedestrian safety** in factories

FRENCH

**ENGLISH** 

**SPANISH** 

Every year, many people lose their lives in the workplace after being struck or crushed by forklifts. More specifically, these people are described as pedestrians since they are moving around the facilities on foot.

When forklifts manoeuvre in production areas, traffic aisles or warehouses, safety measures must be taken to protect workers who are moving around and working nearby.

#### Target audience

It is intended for all members of the hierarchical line, such as internal and external workers, technical staff and tradespeople.

#### 

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.

You'll need to correctly answer all the questions in the current module, which will be presented in « true or false » or « multiple choice » questions to continue your progress. If you fail, you'll have to repeat the module.

#### Legal notice

There are no legal notice associated with this training. No other training or experience is required.

#### △ Intellectual integrity

Given the seriousness of the approach and the importance of the knowledge acquired through this training, the team of SSTenligne invites you to respect the integrity of the training and its questionnaires.

We suggests you answer to the best of your knowledge, that is, without help and without plagiarism.
