

# Emergency measures

🕒 Duration : 60min

FRENCH

ENGLISH

SPANISH

There are a large number of companies that are poorly prepared for emergencies. Nobody is perfectly safe and these situations usually happen unpredictably and without warning. It is therefore important that means of prevention are implemented effectively in order to prevent certain situations from turning into drama.

The development of an emergency plan becomes an essential management tool that allows organizations to better guide stakeholders.

## 🎯 Target audience

It is intended for all regular and casual workers as well as for all corporate executives.

## ☰ Teaching and evaluation methods

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.

You'll need to correctly answer all the questions in the current module, which will be presented in « true or false » or « multiple choice » questions to continue your progress. If you fail, you'll have to repeat the module.

## 🔑 Legal notice

There are no legal notice associated with this training. No other training or experience is required.

## ⚖️ Intellectual integrity

Given the seriousness of the approach and the importance of the knowledge acquired through this training, the team of SSTenligne invites you to respect the integrity of the training and its questionnaires.

We suggests you answer to the best of your knowledge, that is, without help and without plagiarism.
