

# Small road obstructions

🕒 Duration : 60min

FRENCH

ENGLISH

SPANISH

Carrying out work involving the set-up of small barriers on Quebec highways requires the application of safe working methods and compliance with established standards.

In order to be able to effectively secure the work environment, it is essential that the user be familiar with the components, signs and appropriate installation measures. In addition, he/she must know the related risks and must be able to control them in order to avoid any problematic or hazardous situations.

## 🎯 Target audience

It is primarily intended for regular and casual workers who want to be able to set up small road barriers. Whether you work in the telecommunications or construction field, or you are simply interested in acquiring new skills, this training is for you. **Note that it does not include the upper network such as freeways, national, regional and collective roads.**

## ☰ Teaching and evaluation methods

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.

You'll need to correctly answer all the questions in the current module, which will be presented in « true or false » or « multiple choice » questions to continue your progress. If you fail, you'll have to repeat the module.

## 🔗 Legal notice

There are no legal notice associated with this training. No other training or experience is required.

## ⚖️ Intellectual integrity

Given the seriousness of the approach and the importance of the knowledge acquired through this training, the team of SSTenligne invites you to respect the integrity of the training and its questionnaires.

We suggests you answer to the best of your knowledge, that is, without help and without plagiarism.

# Targeted learning

## Small road obstructions
