Musculo-skeletal disorders « MSDs » are one of the main causes of compensation in Quebec. According to the Quebec Population Health Survey conducted in 2014-2015, one in four Quebec workers, or 25%, suffer from non-traumatic work-related MSDs.

The purpose of this training is to make you aware of the different possible means of prevention and to be able to identify risk factors within the company.

🎯 Target audience

It is intended for all workers in various sectors where musculo-skeletal disorders are indeed present within the company.

☰ Teaching and evaluation methods

The learning method for this online training is based on interactivity, dynamism and self-learning. The training will be done at the pace of the learner and according to his/her availability. Your understanding and skills will be evaluated at the end of each module.
